**Viktor A. Kanke. Encyclopedia of metascience and special philosophy of science. – Tallinn: EurAsian Scientific Editions Ltd, 2021 – 1209 p.**

*The formal philosophy of science, its two components, conceptology, and methodology, as well as 21 varieties of special philosophy of science, are considered in a systematic theoretical form. All theories are interpreted within the framework of the main philosophical directions of modernity, in particular, analytical philosophy, hermeneutics, poststructuralism, phenomenology, and critical rationalism. An original theory of intratheoretical and intertheoretical transduction developed. Ethical representations are widely used. Exceptional attention is paid to the transdisciplinary approach, as well as the conceptual development of pluralism in modern science and the fullness of scientific knowledge. The book has no analog in literature. It is intended for researchers, university professors, graduate students, and undergraduates.*

## Table of contents

<b>Table of contents</b> .....	<b>3</b>
<b>Preface</b> .....	<b>12</b>
<b>Chapter 1. The theory of conceptual transduction</b> .....	<b>19</b>
1.1. Concepts of theory and intratheoretical transduction .	19
1.2. The principle of theoretical representation and expressions of theories .....	25
1.3. Criticism of the epistemological dogmas and the status of concepts.....	30
1.4. Intertheoretical transduction .....	38
1.5. The league-theories, their relation and calculation.....	46
1.6. Science and the problem of demarcation.....	59
1.7. Fields and types of sciences .....	64
1.8. The truth .....	71
1.9. Methods of scientific knowledge .....	75
<b>Chapter 2. The nature of philosophy</b> .....	<b>81</b>
2.1. Theory of forms by Plato and Aristotle .....	81
2.2. The opposition of rationalism and empiricism .....	86
2.3. Dialectics of G. Hegel .....	91
2.4. Three positivistic trends.....	97
2.5. Critical rationalism of Karl Popper .....	104
2.6. Analytical philosophy of science: W. Quine .....	109
2.7. Trends in the development of analytical philosophy .....	115
2.8. The main trend of modern German philosophy: Husserl – Heidegger – Gadamer .....	120
2.9. The main trend of modern French philosophy: Foucault – Derrida - Lyotard .....	133

2.10. Philosophy of science, philosophy and metaphysics.....	143
<b>Chapter 3. The nature of linguistics .....</b>	<b>149</b>
3.1. Linguistics and philosophy of linguistics.....	149
3.2. The nature of scientific and non-scientific languages .....	154
3.3. On semiotics, externalism, essentialism and emergentism .....	161
3.4. The linguistic turn in philosophy, discourse and games....	167
3.5. From structural to generative linguistics.....	177
3.6. Pragmatic and functional linguistics.....	184
3.7. Cognitive linguistics and linguistic league-theory .....	191
<b>Chapter 4. The nature of logic .....</b>	<b>200</b>
4.1. Specifics of logic, mathematics and computer science. Philosophy of logic .....	200
4.2. Formal theory and its criteria .....	207
4.3. Logical ontology. Descriptions and rigid designators .....	211
4.4. Logical consequence and argumentation .....	217
4.5. Logical truth, tautologies and paradoxes .....	227
4.6. Development of non-classical logics and pluralism in logic .....	236
4.7. The future of logic .....	241
<b>Chapter 5. The nature of mathematics .....</b>	<b>247</b>
5.1. Mathematical sciences and philosophy of mathematics ..	247
5.2. Intuitionism and constructivism.....	250
5.3. Formalism.....	257
5.4. Set-theoretical, type-theoretical and category-theoretical directions.....	262
5.5. Platonism and fictionalism .....	272
5.6. Structuralism, realism and naturalism .....	280

5.7. Social constructivism. League-theories of mathematical directions .....	291
5.8. Intertheoretical and interdisciplinary relations of mathematics .....	298
<b>Chapter 6. The nature of computer science .....</b>	<b>304</b>
6.1. Scientific status of computer science.....	304
6.2. Passions around information .....	307
6.3. Scientific methods of computer science .....	314
6.4. The paradigm of computer science and the thesis of Church-Turing .....	317
6.5. The development of computer theory: the language aspect .....	321
6.6. Program as stage of conceptual transduction .....	325
6.7. Nature of the computer .....	328
6.8. The nature of visualization.....	332
6.9. Status of computer and information ethics .....	337
<b>Chapter 7. The nature of physics .....</b>	<b>341</b>
7.1. Physics specifics .....	341
7.2. Principles and laws of classical mechanics.....	344
7.3. Development of space and time conceptions.....	349
7.4. Invariance principles and conservation laws .....	353
7.5. How geniuses mastered abduction in relativistic mechanics .....	358
7.6. Foundations of quantum mechanics and pluralism.....	362
7.7. Measurements in quantum mechanics and the role of consciousness .....	371
7.8. Foundations of quantum field theory. Problem of interactions .....	377

7.9. Gauge invariance, spontaneous symmetry breaking, and asymptotic freedom .....	383
<b>Chapter 8. The nature of chemistry .....</b>	<b>389</b>
8.1. About metachemistry and philosophy of chemistry .....	389
8.2. Two dogmas: reductionism and anti-reductionism .....	393
8.3. Theoretical relativity of practice .....	400
8.4. Scientific chemistry methods .....	407
8.5. Manifestations of chemical theories: models and inverse problems .....	420
8.6. Revolutions in the development of chemistry .....	427
8.7. Ethical relativity of chemistry .....	435
8.1. Aesthetic relativity of chemistry .....	440
<b>Chapter 9. The nature of earth science .....</b>	<b>445</b>
9.1 Earth science, geology, and philosophy .....	445
9.2. Specific and methods of geology .....	448
9.5. Geological theory .....	453
9.4. Principles and laws in geology .....	460
9.5. Geological time and space .....	466
9.6. Mobilism and fixism: protracted confrontation .....	471
<b>Chapter 10. The nature of biology .....</b>	<b>476</b>
10.1. Biological theories are not elusive .....	476
10.2. Principles of biological theories .....	483
10.3. The development of biological theories (on the example of modern synthesis) .....	487
10.4. Explanation in biology .....	493
10.5. Biological ontology .....	502
10.6. Biological information .....	508
10.7. The problem of reduction in biology .....	514

Table of contents

---

10.8. Biological time..... 520

10.9. Biological experiment ..... 525

10.10. Biology and ethics ..... 532

**Chapter 11. The nature of technology ..... 537**

11.1. Technology is a branch of science..... 537

11.2. Principles of technological theories ..... 545

11.3. Finding ways to understand the technology..... 550

11.4. Philosophy of technology: Marxist variants ..... 560

11.5. The philosophy of technology: questions to pragmatism.....567

11.6. Postphenomenological philosophy of technology: vague method..... 573

11.7. Poetic conception of technology: unmanifested authenticity..... 581

11.8. Hermeneutic and poststructuralist searches ..... 589

11.9. Technological ethics: metaphysical colonialism..... 595

**Chapter 12. The nature of agricultural sciences ..... 602**

12.1. Agricultural sciences and agricultural theories ..... 602

12.2. Agricultural science and ecology..... 608

12.3. Agricultural ethics as the pinnacle of agricultural science ..... 614

12.4. Ethical relativity of ecology and earth sciences ..... 618

12.5. Political science and agricultural ethics ..... 622

12.6. In search of the principles of agricultural sciences ..... 626

**Chapter 13. The nature of medicine ..... 632**

13.1. What is medicine?..... 632

13.2. Medical theory and science ..... 638

13.3. Framework and patterns of medical epistemology ..... 646

13.4. Principles and principlism ..... 653

13.5. Diagnostics: dual-processing theory vs conceptual transduction .....	657
13.6. Medical truth.....	662
13.7. Informed consent as group theory.....	667
13.8. Methodology for the definition of the concepts of disease and health .....	672
13.9. The concept of health in the context of medical theory .	679
13.10. Medical ethics .....	685
<b>Chapter 14. The nature of pedagogy.....</b>	<b>691</b>
14.1. Pedagogy, metapedagogy, philosophy of pedagogy and philosophy of education.....	691
14.2. From scientific to educational theory .....	697
14.3. Ways to solve epistemological problems .....	704
14.4. In search of the foundations of theories .....	712
14.5. Measurement in pedagogy .....	719
14.6. Didactic principles as epiconcepts.....	727
14.7. Strategy 20-D: goals and quality of education .....	731
14.8. Pedagogy in era of pluralism .....	738
<b>Chapter 15. The nature of psychology .....</b>	<b>745</b>
15.1. Psychology as a set of individual theories.....	745
15.2. Transduction mechanism of psychological theories .....	749
15.3. Forms of representations of psychological theories and mind-body problem .....	757
15.4. Some lessons of emotion trend in philosophy of psychology .....	761
15.5. Specificity, irreducibility, and interdependency of psychology.....	766
15.6. Psychological ethics.....	772
15.7. Unity of psychology and pluralism of its directions .....	780

15.8. The relevance of the union of psychology and philosophy of science .....	787
<b>Chapter 16. The nature of sociology .....</b>	<b>792</b>
16.1. Sociological theory .....	792
16.2. Sociological groups and individuals .....	797
16.3. Scientific methods of sociology: survival and development .....	803
16.4. The way out of the dualism of individualism and holism	810
16.5. Bounded rationality and the scientific method .....	816
16.6. Pluralism of sociological directions. What would it mean? .....	825
16.7. Sociological ethics .....	831
<b>Chapter 17. The nature of economics .....</b>	<b>838</b>
17.1. On the definition of economics.....	838
17.2. Search for methodological foundations of economics ...	842
17.3. Models .....	850
17.4. Misunderstanding of the status of theories.....	857
17.5. Three types of economic pluralism .....	865
17.6. Philosophical-economic pluralism .....	871
17.7. Economic ethics in a vice of dichotomies .....	881
<b>Chapter 18. The nature of political science .....</b>	<b>889</b>
18.1. Political science status .....	889
18.2. Methodology of political science .....	895
18.3. The principle of power .....	900
18.4. The principle of justice .....	906
18.5. Why freedom is not a principle.....	911
18.6. Lessons from critical theory .....	917
18.7. Political science and ethics.....	922

<b>Chapter 19. The nature of law .....</b>	<b>931</b>
19.1. Foundations of legal theory .....	931
19.2. The methodology of law does matter .....	937
19.3. Evidence .....	943
19.4. Legal responsibility .....	951
19.5. Punishment as principle .....	956
19.6. Law in interdisciplinary relations.....	964
19.7. The main legal schools .....	971
<b>Chapter 20. The nature of historiology .....</b>	<b>982</b>
20.1. The nature of historiological theory.....	982
20.2. Historical time and temporal processes.....	986
20.3. Evidence, causation, counterfactuals, and necessity .....	992
20.4. Explanation, understanding and colligation .....	999
20.5. Scientific theory and metaphysical pretensions to it ....	1006
20.6. Historicism and historical method .....	1013
20.7. The sluggish ethical turn .....	1019
<b>Chapter 21. The nature of sciences of arts .....</b>	<b>1026</b>
21.1. Foundations of art and aesthetics.....	1026
21.2. Critique of the metaphysical foundations of art and aesthetics .....	1033
21.3. Foundations of musicology .....	1038
21.4. Foundations of filmology.....	1044
21.5. Foundations of teatrology.....	1053
21.6. Foundations of literature .....	1061
21.7. Foundations of depiction .....	1070
<b>Chapter 22. The nature of ethics.....</b>	<b>1078</b>
22.1. What kind of science is ethics? .....	1078

Table of contents

---

22.2. The construction of scientific ethical theory..... 1084

22.3. Conceptual transduction versus reflective equilibrium 1091

22.4. Ethical pluralism ..... 1097

22.5. Truth in ethics? ..... 1105

**Conclusion. Philosophy of science facing new challenges ..... 1113**

**Subject index ..... 1116**

**Name index ..... 1134**
